

## ENVIROFLECT

Enviroflect is an environmentally friendly water based Aluminium / Silver protective coating designed to give a bright silver finish when dry, which will reflect Ultra Violet rays and reduce temperature build up and enhance the lifespan of the waterproofing system.

Enviroflect is designed to be a protective and decorative coating. Enviroflect is designed to reflect the harmful Ultra Violet rays of the sun over many surfaces such as;

- Bituminous membranes
- Metal Surfaces
- Easygum (bituminous rubber)

Enviroflect may be applied by brush, roller or spray at a coverage rate of approx 5 sqm per litre. Ensure all surfaces are free of loose material, oils, grease and other surface contaminants. New steel or galvanised iron should be degreased and weathered 3-6 months. Available in 5, 10 and 20kg units.
